Regular servicing and maintenance of your Ford Mustang can help maintain its resale value, save you money, and make it safer to drive. Take your entire manual with you on every journey. You might not need every tool for every procedure. The Mustang was designed and developed as a line of sporty coupes and convertibles originally based on the platform of the second generation North American Ford Falcon, a compact car. The fourthgeneration Mustang was based on an updated version of the "Fox4," a rearwheeldrive Fox platform. Between 1965 and 2004, the Mustang shared a common chassis with other Ford lines and remained a rearwheeldrive vehicle during its production. For the fourthgeneration, the notchback coupe and hatchback body styles were unavailable for the first time since the Mustang's introduction in 1964. A convertible body style returned in this generation, in addition to the fastback coupe body style. The fourthgeneration Mustangs feature a "dualcockpit" layout that includes sweeping curves and contours. More options were added during this fourth generation, including power windows, cruise control, remote keyless entry, and air conditioning. For the 1999 model year, the Mustang was redesigned with Ford's New Edge styling theme that featured sharper contours, larger wheel arches, and creases in its bodywork. The 1996 Mustang GT was upgraded to a Modular 4.

Then, you will definitely love Americans muscle cars. Coined in 1949 due to Then, you will definitely love Americans muscle cars. Coined in 1949 due to the demand for a fast car, muscle cars have become one of Americas most loved cars. The 1960s and 1970s saw the creation of some of the best muscle cars of all time. If you are looking for a muscle car, read one as we look into some of the best muscle cars. The Mustangs have undergone a series of transformation from the first to the fifth generation. There is more to this car that will make you want to own it. It was based on an Fbody platform and offered no less than three sixcylinder engines and four V8s. A longer and wider Camaro was then introduced in 1970. The fifth generation Camaro was later introduced in 2010 with a better body and an even better performing engine. Several other challengers were later introduced over the years but the oil crisis crippled the sales of the muscle cars and this lead to the early retirement of this car in 1974. In 2008 the challenger made its way back and this 3rd generation challenger has soldiered on and so far has had a number of stylistic updates. It is very fast and has a 797 horsepower supercharged V8 engine.

It featured fourwheel disc brakes, optional side exhaust pipes, a big block, and a 6.5 liter V8. This muscle car has gotten even better with time and the C6 generation that was produced from 20052013 and has better handling and is a muchloved sports car. Get ready to experience this legendary ZR1 supercar with a 755 horsepower and a top speed of 212 MPH. If you want a luxurious muscle car, the dodge viper will be an ideal choice. This car has been in the market for 25 years and it is one of the best classics. It also borrowed a little bit from the Ferrari. This muscle car was an instant hit and GM improved its performance over the years. However, in 1974, its sales went down forcing its production to stop. Though you will not be able to find a new Pontiac because 2006 was the last year it was produced you can still buy it from its original owners. In 1967, the second generation Plymouth was introduced and it had responded to the need of the market. The model was much more aggressive with a V8 motor and better handling. It had three V8 engines and was on its way to muscle cars success. These cars have both high and low performing options but if you want to feel the real American muscle cars, then the high performing option is your ideal choice. Subscribe to our newsletters. With Jeep, you get the ultimate combination of fuel efficiency and all the offroad muscle of a desert driving machine. You get heavyduty, bodyonframe construction, locking differentials, fourwheel drive, stout axles, and big, sturdy tires. It even started as a farm tractor, so you might say it was born for dirty business. But this hardbodied desert vehicle can carry you through the bumpiest, and sandiest, offroad terrains like a chainsaw cutting through a stick of butter. Pack a spare tire, or two. If you need an emergency windshield or glass replacement while in Arizona, you can get help here. Plenty of tough offroad vehicles can carry you safely through your Arizona desert adventure.

Have a blast. When You Should Repair or Replace Do you feel like you're spending Do you feel like you're spending too much on repairs But figuring out if you should repair or replace your vehicle can be tough. We'll give you the inside scoop on whether to repair or replace your used car. If you have an older car, however, you know how it feels to get stuck paying for expensive parts and repairs. As long as your repairs are less than half of what your car is worth, go ahead and get them done. The answer is that even expensive repairs probably cost less than the monthly payment on a new car. They may be able to help you finance the cost of repairs. If you're thinking of buying a home or taking a vacation, repairing your car will help you save money towards those goals. Increasing the amount of debt you owe may cause a temporary dip in your credit score. Get your mortgage first and then think about whether you can afford to finance a new car. It's worth it, however, when you drive down the street and everyone notices you pass by. Was it your first car. Did you start a new job or

take your first road trip in the car If you want to repair it and keep it running, then you should talk to your mechanic about how to proceed. There are a few options available to you, including buying a certified preowned vehicle or leasing a new car. If your used car has a transmission problem or an engine problem, you're signing yourself up for thousands of dollars in repairs. How much are you losing in wages each month That'll cover any repairs and help you keep your car on a maintenance schedule. How does its backup camera work. How about its proximity detectors You will probably not be able to install new equipment on an older model, so it makes more sense to get a new vehicle. Dealerships are trying to meet sales quotas and you could get a great deal. If you're willing to drive last year's model, you could save thousands of dollars.

If you're looking for a new car, you can usually find one that's a few years older for an even better deal. When you take pictures, you don't want to have any junk in your back seat or clutter in your trunk. Don't sell your car for less than it's worth and reject "lowball" offers. If they want to inspect the car, meet with them during daylight hours and always stay in the car if they want to test drive it. Try to bring along a friend or family member who knows a lot about cars they'll be able to help you avoid buying a lemon. The first thing to look at is the oil. It should be a clear color of dark brown. If it looks more like milk, then the car probably has a problem with its coolant. If it's darker than that or smells like it's burning, skip that car entirely and find a new used car lot. You may have an urgent need for a car, but buying a broken vehicle won't do you any favors. They will be able to tell you the true value of your car and the value it could have as a tradein. Are you planning on taking long trips in your car or just using it for your work commute Talk to your friends, family, and colleagues you never know where you'll find your next vehicle. We have a wide range of blogs that will help you make your own repairs and save money to get a new car. As a matter of fact, the With a price tag like that, it's imperative that you protect your purchase. If you've seen these covers around but haven't taken the leap towards buying one, here's why you should. Still, if you park your car outside every day for hours at a time, your paint is going to fade. Rather than just resigning yourself to that fate, outdoor car covers may protect you from what seems inevitable. Heavyduty ones may provide enough protection to absorb those dreaded door dings. An outside car cover makes it so that target isn't your vehicle. Fortunately, they're not thanks to the volume of buying options that there are online.

Semicustom and custom made to order covers for Boat, Jetski, Bimini, Car, Snowmobile, Motorcycle, Trike. " After trying one out, you'll wonder how you ever lived without it! Keep reading more of our content today! If you don't plan to keep the car very long or you don't drive too many miles, a lease may be a good option. Here's a guide to help you navigate a lease vs finance options for your next car. This is a record high and a number that experts believe will continue to grow in the coming years. But why And, which one is best for you Luckily, there are some key differences between the two that may sway your decision. Here they are The car is in your name and you can eventually sell it for a newer model. You can also customize or modify it to your pleasing. Once the lease is up, you have to return the car. You have to return the car to its original state. You're also paying the interest on the loan and any other taxes and fees. You're also paying rent charges, taxes, and other fees. This means that you can sell or trade it for another model at any time you'd like. Also, if you sell your vehicle, you can use the money you make to pay the rest of your loan. That said, if someone buys the car from the leasing company, you may not have to pay extra fees. This means that you'll have to sell or trade it for another model. You pay all the final fees and you can then choose whether to lease another one or not. That said, its value is yours. Once again, this means that you can sell it or trade it as you choose. But, you won't have any rights over the ownership of the vehicle. That said, it does lower the retail value of the car. Of course, wear and tear are normal. But, if it exceeds these normal damages, then you will have to pay more at the end of your lease term. There are some easy repairs you can do yourself by following these tips. The monthly payments and down payment are lower. Sometimes, you don't even have to make a down payment.

Your repair costs will also be lower because the factory warranty will cover most wear and tear. Last but not least, the sales tax is lower on a lease. The company you lease with will most likely limit your mileage. While you can buy extra, most companies limit mileage to 12,000 miles per year. And, be careful, leasing companies will find any way to charge you higher wear and tear fees. That's not to mention the charges you'll incur if you try and end your contract early. You own it and can do with it as you please. You can drive as much as you want. Over time, if you decide you want to get a new car, you can sell or trade in your current one. This means you can give it a paint job, tint the windows, and change the interior if you choose to. You should also pay a larger down payment so that you don't end up owing more than the car is worth. You also have to pay for any repairs. Luckily, there are some preventative car maintenance services that are affordable and reliable. And, as we all know, a car isn't an investment that is going to make you money. Its value will only depreciate over time. But, remember to get lease terms that suit your needs. If you try and get out of a contract early, it could cost you a small fortune. That said, if you're leasing for business, a part of the costs are tax deductible. If you have kids, pets, or are prone to scratches and bumps, a lease may not be your best option. In this case, we suggest you buy. If you go over the 10 to 15,000 miles threshold per year, you may have to pay for each extra mile. With a lease, you may be able to avoid the down payment altogether. You'll also pay fewer sales tax. That said, when financing, each payment will go towards you having ownership of the vehicle. If you lease, the only option you have is to With both car buying options, you'll have a variety of choices about which vehicle you drive.

Aside from learning about your vehicle, you'll know exactly what to do if you're faced with unexpected repairs. Unsourced material may be challenged and removed.The V6 produced 145 hp 108 kW; 147 PS at 4000 rpm and 215 lbft 292 Nm of torque at 2500 rpm. For 1996, the base V6 gained five horsepower with a new powertrain control module PCM, the EECV. The AODE transmission was replaced with the 4R70W 4speed automatic transmission for 1996.Other interior colors—such as black and beige—were also available. Efforts were made to improve the cars handling as well as noise, vibration, and harshness NVH conditions over the previous generation Mustang. The Mustangs front suspension makes use of MacPherson struts with longer lower control arms, new spindles, antiroll bars, and other enhancements over 1993 and older Mustangs.The 1994 Mustang offered many options, some of which later became standard equipment. The preferred equipment package came with power windows, mirrors, and door locks, remote keyless entry, air conditioning, cruise control, and a trunk cargo net. Also available was Fords Mach 460, 230watt multispeaker sound system with CD player. Production of this Mustang ran until October 1998.Total output from the engine was 215 hp 160 kW; 218 PS at 4200 rpm and 285 lbft 386 Nm of torque at 3400 rpm. The 1994 Mustang GT was named Motor Trend Car of the Year.Valve cover bolt patterns are one. Romeo has fewer bolts than the Windsor.

Another difference is the front cover bolts. The Windsor uses 8 mm and the Romeo uses 10 mm bolts. The Romeo uses jack screws on the main caps and the Windsor uses dowels. The new engine produced 215 hp 160 kW; 218 PS at 4400 rpm and 285 lbft 386 Nm of torque at 3500 rpm, matching the output of its predecessor. For 1998, the 4.6 L V8 received a small increase in output, resulting in 225 hp 168 kW; 228 PS at 4750 rpm and 290 lbft 393 Nm of torque at 3500 rpm. This was achieved through PCM calibration and a modified fuel system.For the 1994 and 1995 model years, the 5.0L V8 was modified for the Cobra with unique intake manifolds, cams, fuel injectors, and heads. In 1996 it was available in a special color package called the Mystic Cobra which consisted of a very expensive

Chromalusion paint job like the MystiChrome package on 2004 models. Characterizing the redesign was Ford's New Edge design language, which featured sharper contours, larger wheel arches, and creases in the bodywork, replacing many of the soft lines of the previous model. The Mustang also received new wheels and hubcaps. However, the car carried over the same roof line and interior, in addition to the same basic platform. The lamps were still composed of three vertical segments, reminiscent of the original. Minimal changes occurred from year to year, most noticeable was a redesigned center panel in the dashboard for 2001, which now allowed for double DIN stereo head units, including an in-dash six-CD player. The rear window defroster switch, previously mounted below the headlamp pull switch, was moved to the lower center stack below the stereo. When equipped, the fog lamp switch was relocated to the lower center stack as well, previously, it was on the center console adjacent to the cup holders. The third button on the lower switch panel was for the traction control system on V8 models.

On convertible models, the power roof switch remained on the center console on coupe models, that switch was replaced with a small coin holder. Available only as a coupe, the Bullitt was a mildly upgraded version of the standard GT. These power upgrades led to a factory rating of 265 hp 198 kW, a gain of five horsepower over the standard GT. On the exterior, the car received unique TorqThrust style wheels, removal of the fog lights for the US market, but standard for Canada and rear deck spoiler, as well as new trim accents. The Mach 1 was equipped with a 4.6 L DOHC 305 hp 227 kW engine based on the engine available in the 1999 and 2001 Mustang Cobras, with new cylinder heads from the 2003 to 2004 Cobra see above. It also featured retro themed gauges and a unique aluminum shifter ball. The anniversary package was available in Crimson Red exclusive to package, Oxford White or black. Ford produced 4,558 Crimson Red models. Most 40th Anniversary package cars came with Parchment tan leather interiors. Some came with black leather. This is possibly a Canadian variation. This possible Canada-only variation also features 2003 Cobra wheels, no hood stripes and Mustang decals on the lower body side panels under the doors. Other than two preproduction units, all Crimson Red vehicles were built from August through November 2003. Forty-one of the Crimson Red cars were sent to Roush Industries for conversions into Roush Mustangs. Archived from the original on May 31, 2008. Retrieved 20080608.
